hey Radha -- just one thing to flag: the set with "Radha" next to them aren't the complete set of items on which we'll need Sec. Regan's direct input. We've found a few more, but I think we flagged the most important ones on the first pass

we may convene the group in a sec (at least in a chat) to work on some doc numbering & formatting issues that the new draft has introduced, but otherwise we're in good shape, I think

start at the beginning and review the track changes; make any edits you'd like along the way; we've highlighted some areas and added margin comments where comments introduced an issue, so take a look at those in particular and feel free to remove the highlighting and delete the comment once you're comfortable with what it says

we've accepted all changes in the same shared file we've been using, we've re-enabled track changes, and we're going to do a quick Karen-Kristien-Sven-Matt read of the clean doc to flag anything else we see, and then send a clean version to the OCIR QFR group for final proofing

I've received three questions from folks so far asking to see the final versions (both within and outside OCIR). Robin, I seem to remember yesterday morning us thinking that we could send to folks if they ask, but perhaps not immediately blast them out to everyone?
